OutsiderMap

Ten thousand places.

One answer.

Brand Book

YOUR CITY, YOUR TASTE · 2026

The design *is the brand*.

OutsiderMap is hyper-personalized city discovery, Delhi first. Generic tools give you ten thousand options; OutsiderMap builds a personal taste profile and gives you the answer. The brand should always feel like the city at 3am: warm, low-lit, a little secret, and absolutely sure of itself.

Name	OutsiderMap - one word, capital O, capital M
Promise	Tell us your mood; we already know your taste; get the answer.
Primary line	Ten thousand places. One answer.
Tagline	Your city, your taste.
Home base	Delhi · "Made for Delhi"
Mode	Dark-only. There is no light theme.
Feeling	Cinematic, minimal, nocturnal, confident, a little underground.

B R A N D S T O R Y

People hit decision paralysis at the moment of intent. You know your mood ("it's 3am and I want something") but generic tools give you ten thousand options and none of them know you. OutsiderMap collapses those options into one confident, personal answer. Everything in the brand expresses that single move: many becomes one. The scattered city lights converging to a single bright point is not decoration; it is the product thesis, enacted.

Delhi's *night light*.

The palette is derived from Delhi's actual night light: a warm amber-brown haze (never blue-black), streets lit by sodium-vapor lamps, neon reserved for the underground. Every value is a real CSS token in globals.css. Rule: never hardcode colors in components - use the tokens.

C O R E P A L E T T E

	Night #0c0a08	Primary background. Warm asphalt black; also the browser theme color.
	Surface #16120e	Cards, panels, raised containers.
	Raise #1e1914	Highest elevation: chips, default badges, skeletons.
	Line #2b241c	Borders, dividers, hairlines.
	Ink #ede7db	Primary text - warm paper-white, never pure white.
	Ink Dim #9b9183	Secondary text, captions, the muted system voice.

A C C E N T & S I G N A L

	Accent - Sodium Amber #f0a431	The default voice of the brand. Primary actions, focus, the 'one answer' point, the logo dot.
	Ember #c87c1f	Deeper amber. Primary-button hover; secondary light in the hero field.
	Under - Neon Violet #b48aed	Reserved exclusively for underground / premium. Never ordinary UI.
	Danger #e0654f	Errors and destructive actions only.

T H E T W O - A C C E N T D I S C I P L I N E

OutsiderMap runs on two accents with strict, separate jobs. Amber is the everyday brand color - free product, primary CTAs, the recurring sodium-lamp glow. Violet means underground / premium and nothing else. A violet halo, badge, or border is a promise that something is exclusive; spending it on a generic button breaks that promise and dilutes the conversion signal. When in doubt, it's amber.

L I G H T I N G M O T I F S

- .halo - a soft radial sodium-lamp glow in amber (~14% accent). The recurring lighting motif behind heroes and CTAs.
- .halo-under - the same glow in violet (~12% under), only behind premium / underground sections.
- ::selection - text selection is amber at 30% opacity.

Three voices, *three jobs*.

Three typefaces, each with a distinct job, wired as CSS variables in layout.tsx. (Specimens below are rendered in PDF substitute faces; the brand faces are named in each row.)

DISPLAY

Fraunces Ag

Headlines, the wordmark, big editorial moments. Often italic for the punchline.

BODY

Geist Sans Ag

All running text, UI labels, paragraphs.

MONO

Geist Mono Ag

The 'system voice': eyebrows, timestamps, query input, metadata, fine print.

T H E D I S P L A Y S I G N A T U R E

Headlines follow one rhythm: a statement in upright Fraunces, then the key phrase in italic amber (or italic violet in premium contexts). This 'upright setup, italic payoff' is the most recognizable verbal pattern in the brand.

Ten thousand places. *One answer.*

A profile that gets you, *then gets better.*

The weekend, planned. *The underground, open.*

The city already knows *you're coming.*

T H E S Y S T E M V O I C E (. V O I C E)

Small mono eyebrows and timestamps that frame content: mono, 0.6875rem, letter-spacing 0.3em, uppercase, color ink-dim. Examples: DELHI · 3:00 AM, RIGHT NOW MODE · FREE, WHEN YOU WANT MORE, MADE FOR DELHI. It always sits above a display headline and is always quiet - ink-dim, never accent.

The one *answer.*

The app mark is the brand thesis in miniature: a rounded night-black tile with one bright amber circle at the optical center and a few faint amber points around it - ten thousand city lights collapsing to the single answer.

C O N S T R U C T I O N R U L E S

- The central amber dot is the answer - always brightest, always centered, never decorative.
- Surrounding lights are faint ($\leq 55\%$ opacity) and few; they suggest a field without competing.
- The tile is night, not pure black, with a generous corner radius.

T H E W O R D M A R K

Set 'OutsiderMap' in Fraunces italic. One word, capital O and capital M, no space, no hyphen. In compact lockups it pairs with the system voice beneath it (wordmark + MADE FOR DELHI). The Open Graph image is the canonical hero lockup: night canvas, scattered amber lights, a glowing answer-point with a halo, the headline 'Ten thousand places. One answer.', and the kicker OUTSIDERMAP · DELHI in spaced uppercase ink-dim.

D O N ' T

- Recolor the answer dot (always accent; violet only in an explicit premium lockup).
- Add more than a sparse handful of background lights.
- Set the wordmark upright/bold or in the body or mono faces - it is Fraunces italic.
- Place the mark on a light background. The brand is dark-only.

A long, *confident settle*.

Motion is core to the brand - cinematic, minimal, motion-rich. One easing curve defines the feel: easeOutExpo = cubic-bezier(0.16, 1, 0.3, 1), also exposed as the --ease-out-expo token. Default transition duration is 0.8s.

S T A N D A R D E N T R A N C E S

fadeUp	opacity 0->1, y 24->0	The default reveal for almost everything.
fade	opacity 0->1	Subtle fades.
scaleIn	opacity 0->1, scale 0.96->1	Cards, focal elements.
stagger	0.12s between children	Grouped reveals (hero, lists).
staggerSlow	0.18s between children	Full-section reveals.

T H E S I G N A T U R E S C E N E - C O N V E R G E N C E F I E L D

The one hero 3D moment: a field of ~1,400 sodium-amber city lights drifts, then collapses into a single bright point (the answer), holds and breathes, then scatters again on a ~10.5s loop. Lights are mostly amber, some ember, a few warm-white, additively blended over night. Use it as the signature, not a background gimmick - one is enough.

R E D U C E D M O T I O N I S N O N - N E G O T I A B L E

prefers-reduced-motion is respected globally and per component: the Convergence Field renders as a static night-city scatter; the typing demo shows its final state instantly. Always honor it.

Pills, cards, *amber focus*.

Shared traits across the design system: fully rounded pills for actions, soft rounded cards (--radius-card: 1.25rem), hairline 'line' borders, amber focus, generous dark space.

B U T T O N S

primary	The main call to action. Amber on night; hover ember.
secondary	Transparent, line border. Secondary actions, 'Sign in'.
ghost	Tertiary / inline.
under	Premium / underground actions only.
danger	Destructive only.

B A D G E S · C A R D S · I N P U T S

- Badges - small rounded-full tags: default (raise/ink-dim), accent (amber tint, e.g. 'matched to your profile'), under (violet, 'Premium'), outline.
- Cards - rounded-card, border line, bg surface, p-6. Premium cards switch the border to under/30.
- Inputs - rounded-xl, bg surface, border line, placeholder ink-dim/60, and an amber focus border.
- Focus - every focusable element gets a 2px amber focus-visible outline. Visible keyboard focus is a brand requirement.
- Spinner - a line ring with an amber top; skeletons pulse in raise.

T H E ' R I G H T N O W ' S U R F A C E P A T T E R N

The core interaction is a terminal-like exchange: a mono prompt with an amber > caret, the user's natural-language query typed in, then one answer card - name in display type, meta in ink-dim, a short bulleted 'why' with amber markers, and an amber 'matched to your profile' badge. Lead with the answer; justify it in two or three tight lines.

Give the answer, *then the reason.*

D O

- Give one answer, then the reason. ('Greasy enough to fix the night. Open when nothing else is.')
- Write for real, late, human moods - lowercase, unfiltered in user-voice examples.
- Use the upright -> italic-accent headline rhythm for big statements.
- Keep system framing in the quiet mono .voice.
- Lean nocturnal and a little secret for premium ('If it's on Google, it doesn't count').

D O N ' T

- Present a menu of ten options or hedge ('you could try...').
- Sound like a corporate listings site or use generic hype.
- Spend the violet / underground signal on ordinary copy.
- Promise more cities loudly - it's 'Delhi first', 'more cities later'.

R E F E R E N C E L I N E S (C A N O N)

Ten thousand places. One answer.

Your city, your taste.

Ask at 3am. Mean it.

The weekend, planned. The underground, open.

The city already knows you're coming.

Made for Delhi.

Design *tokens*.

The `@theme` block in `src/app/globals.css` is canonical. Update this book whenever tokens, fonts, or signature components change.
